

HYPNOS®

Wake up Beautifully.

TAILORED *Sleep* COLLECTION

LUXURY WOOL PILLOWS & BEDDING

PROUDLY BRITISH SINCE 1904

Tailored Sleep, Naturally

Ultimate luxury lies in the quiet pleasure of drifting into a perfect night's sleep. Crafted in Britain with certified, responsibly sourced wool from British farms, this tailored collection reflects a refined and bespoke approach to sleep comfort - where a choice of exceptional natural materials and craftsmanship come together with effortless elegance.

Wool's innate ability to regulate temperature creates a beautifully balanced sleep environment, adapting intuitively to your body temperature - warm as the night cools, cool as the room warms. Its fibres gently wick moisture away from the skin, maintaining a dry, breathable, hypoallergenic micro-climate that supports deeper, more restorative rest. This natural harmony has been shown to encourage longer periods of uninterrupted sleep, helping you wake feeling renewed.

Curate your own sleep experience with a selection of pillows made with natural wool, or combined with soft feathers or cushioning latex; while duvets in lightweight and all-season weights let you refine your level of comfort throughout the year. Wool mattress and pillow protectors add a breathable layer that helps preserve the longevity of your mattress and pillows.

From farm to finished stitch, this is British luxury at its most considered - crafted with integrity, shaped by nature, and designed to elevate every night's rest.

All Hypnos pillows and bedding are made with pure cotton, and are guaranteed for two years. Packaged in reusable cotton bags perfect for storage.

The Tailored Sleep Collection is uniquely crafted with traceable British wool certified to the globally recognised Responsible Wool Standard. Each fibre has been carefully selected and gently processed to preserve its natural qualities, loft, and resilience.

Hypnos is proud to be part of The Woolkeepers®, bringing together British farmers with industry partners dedicated to creating high-quality wool products. The initiative supports sustainable farming practices and animal welfare, ensures fibre quality and traceability to the farm, whilst ensuring that UK farmers are paid fairly for their wool.
